Erratum: Preserving High Multibunch Luminosity in Linear Colliders [Phys. Rev. Lett. 85, 984 (2000)]

Courtlandt L. Bohn and King-Yuen Ng

In transcribing Eq. (5) of the subject paper, we inadvertently dropped the adiabatic-damping coefficient $[\gamma(0)/\gamma(\sigma)]^{1/2}$, as well as a pair of parentheses in the exponent. The correct form of Eq. (5) is

$$\begin{Bmatrix} C(\sigma,\theta;M) \\ S(\sigma,\theta;M) \end{Bmatrix} \equiv \sqrt{\frac{\gamma(0)\Lambda(0,\theta)}{\gamma(\sigma)\Lambda(\sigma,\theta)}} \begin{Bmatrix} \mathrm{Re} \\ \mathrm{Im} \end{Bmatrix} \exp\left\{ i\left[M\omega\tau\Delta(\sigma) + \int_0^\sigma d\sigma'\,\Lambda(\sigma',\theta) \right] \right\}.$$

We apologize for the typographical error; the analytic and numerical results of the paper stand unchanged.
